

TROJANUVLOGIC™ SERIES // HIGH PERFORMANCE UV SYSTEMS

A robust, highly versatile and cost effective UV water treatment system featuring proven low-pressure, high-output amalgam lamp technology.

MODEL SHOWN: TrojanUVLogic 04AS20 // **INDUSTRIES:** Aquaculture, Food & Beverage, Life Sciences, Microelectronics, Recreational Waters // **FLOWRATES:** 230-7489 GPM @ 95% UVT, 290-8141 GPM @ 99% UVT // **APPLICATIONS:** Disinfection, Chlorine/Chloramine Destruction, Ozone Destruction // **DESIGN CAPABILITIES:** Custom Configurations or Skid Capabilities

TROJANUVLOGIC SERIES

The “L-shaped” reactor design was developed using advanced computer modeling, resulting in 40% greater hydraulic efficiency than conventional systems and features the industry’s most proven low-pressure, high-output (LPHO) amalgam lamp and variable output power supply technology.

The TrojanUVLogic Series consists of a 316L stainless steel treatment chamber and a UL TYPE-3R 304L stainless steel control cabinet featuring a microprocessor-based controller. The compact size maximizes installation flexibility and preserves floor space with the ability to mount in line, horizontally or vertically.

Single-ended lamps and quartz sleeves allow for quick change-outs without tools. TrojanUVLogic systems are CE compliant as well as NSF 50 and cULus certified.

Aquafine TrojanUVLogic™ series for disinfection, ozone destruction, chlorine and chloramine reduction utilize amalgam lamp technology to meet rigid quality standards within the Aquaculture, Recreational Waters, Life Sciences and Food & Beverage industries.

Amalgam technology

Aquafine’s TrojanUVLogic™ systems feature the industry’s most advanced low-pressure, high-output (LPHO) amalgam lamp technology and variable output power supplies, which optimize both the dose delivered and the power consumed by the system. TrojanUVLogic systems require only one-third the number of lamps to deliver a dose equivalent to those of conventional UV systems.

Safe & Effective

UV disinfection is a chemical-free process that adds nothing to the water except UV light. It provides rapid, effective inactivation of microorganisms through a physical process. When bacteria, viruses and protozoa are exposed to the germicidal wavelengths of UV light, they are rendered incapable of reproducing and infecting. No carcinogenic disinfection by-products are created, and no transportation, storage or handling of toxic or corrosive chemicals is necessary.

Guaranteed Performance and Support Services

All of our systems come with a lifetime disinfection guarantee. Customer support is available from our Authorized Distributor Network and from our 24/7 Technical Service Group.

For questions regarding your application needs, please contact your local Authorized Distributor or Aquafine for more information.
