

Characteristics

This dark green polyisoprene synthetic material has all of the preferred physical characteristics of natural rubber latex without the natural rubber proteins and allergens. An ideal option for an underglove when using a double gloving system, the dark green color allows users to easily see breaches in the outer glove. The aqueous gel interior provides superior donning even when hands are damp or during double gloving.

Prestige® PI Green
Polyisoprene

Series 145

**Surgical Glove
Sterile**
